

APPENDIX 14

DETAILED SUMMARY OF TIMBER HARVESTING ON JDSF CUMULATIVE WATERSHED EFFECTS ASSESSMENT AREA, 1986 THROUGH 2004

Including THP number, watershed units, and acres by silvicultural system class and yarding system.

Key to Silviculture Classifications System	
Class A	
Clearcut	Powerline Right of Way
Conversion from timberland to pasture	Rehab Understocked
Diameter Limit Cut	River High Grade
Diameter Limit Cut >24"	Shelterwood Seed Cut
Diameter Limit Cut >30"	Structure Tree Cut*
Diameter Limit Cut >36"	Seed Tree Seed Cut
Diameter Limit Cut >42"	Variable Retention
Class B	
Alternative Prescription	Diameter Limit Cut >22"
Diameter Limit Cut >30"	Diameter Limit Cut >23"
Diameter Limit Cut >15"	Shelterwood Preparation Cut
Diameter Limit Cut >20"	Shelterwood Removal Cut
Diameter Limit Cut >21"	
Class C	
Commercial Thin	Sanitation Salvage
Group Selection with Commercial thin between groups	Single Tree Selection
Group Selection	Seed Tree Removal Cut
Group Selection and or Group Selection with Single Tree Selection between groups	Transition
*Similar to a Seed Tree Seed Step or Shelterwood Seed Step in which additional trees were left to provide wildlife habitat structure.	

DRAFT ENVIRONMENTAL IMPACT REPORT FOR PROPOSED JDSF MANAGEMENT PLAN
